## Exploratory Data Analysis – Retail (Level – Beginner)

- Perform 'Exploratory Data Analysis' on dataset 'SampleSuperstore'
- As a business manager, try to find out the weak areas where you can work to make more profit.
- What all business problems you can derive by exploring the data?
- You can choose any of the tool of your choice (Python/R/Tableau/PowerBI/Excel/SAP/SAS)
- **Dataset:** <https://bit.ly/3i4rbWl>
- **Beginner Level** - Create dashboards. Screen-record along with your audio explaining the charts and interpretations.
- Task submission:
  1. Create the dashboards and/or storyboard and record it
  2. Upload the recording either on YouTube or LinkedIn
  3. Create a LinkedIn post as suggested in FAQs

## **BUSINESS INSIGHTS**

- I- After doing comparison of all category, it is clearly visible that furniture category is not performing up to the marks we can improve the marketing strategy and product quality to increase the cells and profit.**
- II- In term of region south and Central are not performing that will for south reason we can provide more discount and for Central reason we can focus more on marketing experts.**
- III- Copiers and phone are our stars are categories whereas art envelope levels fasteners are poor performer.**
- IV- Shipment mode standard class generate highest sales and profit where's first and second class nearly yelled some result so we can stop second class and keep only first class as this will be give premium experience to customer and will help us to retain them in future.**
